Why are you here?

To build and support the capacity of principals to systematically and effectively lead PreK-3 efforts in their schools and communities to improve the learning outcomes for all children

- Principals working in the PreK-3 continuum essentially bridge between two worlds.
- To successfully navigate these two worlds, we must recognize that success in PreK3 is not a one-size fits all approach.
- Provide MN P3 Principals with a tool and TIME!

So what are we ‘digging into’ today?

- Today’s Agenda:
  - Terrie Rose, Steven Tozer, Bobbie Burnham
- Group Work
  - AM: Self Assessment and Questions for Reflection (working lunch)
  - PM Group Work- Competency 1.

What competency are we are exploring today?

#1 Effective principals embrace the concept of high-quality PreK-3 learning as the foundation for children's developmental growth.

What needs to occur/improve to create learning environments where young children come to school ready to learn and are able to read on grade level by grade 3-while continuing that achievement in later grades?".

What needs to change to keep ALL students engaged and motivated in learning that will last a lifetime?

Staying Connected
